MASCOT® SAFE

A BROAD AND STRONG COLLECTION OF SAFETY WORKWEAR

Manufactured and approved according to European standards. MASCOT's safetywear encompasses a wide range of one-tone and two-tone fluorescent workwear and winterwear certified according to the EN471 standard. Several of the garments in this collection are manufactured in Mascotex®. Mascotex® is breathable, wind and waterproof and keeps moisture and perspiration away from the body. In addition, the collection includes two-tone multi-protective garments that are antistatic, flame-retardant and acid and chemical-resistant while also protecting against electric arc.

FABRIC Fluorescent raw material mixture consisting of polyester and cotton. The cotton is mostly on the inside, which makes the garments comfortable to wear.

FUNCTIONALITY All products with reflective tape are certified according to EN471, i.e. the highest visibility level and requirements for anyone working on streets and roads.

DETAILS The products have many important details such as double storm flap with zip and an outer zip at the collar for attaching a hood.

DESIGN The design is functional and allowance has been made for an easy fit. Available in several colours with the possibility of mixing plain and two-tone garments.
